

To all partners and customers

Teningen, May 2019

### Power Quality Controller 2019 EDITION - V3.0

Dear Partners and Customers,

We are pleased to inform you about the release of version 3.0 of the Power Quality Controller "PQC".

Already since 20<sup>th</sup> May 2019, the PQC version 3.0 has been delivered in FRAKO power factor correction systems and as single component.

During the development, the focus was on optimizing operation and handling. In co-operation with selected partners and customers, a concept has been developed which makes operation considerably easier for commissioning and maintenance personnel. In addition to the general revision of individual screens, the menu structure has been adjusted.

Furthermore, some functions, such as the guided commissioning and alarm management, were optimized.

### Compatibility & Update

Kindly be informed that the new firmware V3.0 is fully compatible with previous PQC's. Each PQC can be upgraded to V3.0. If you would like to update your existing PQC, we hereby refer to the competent support provided by our service department, which you can reach by calling +49 7641 453-544 or e-mail to [service@frako.de](mailto:service@frako.de).

We thank you for the confidence you continue to place in us and our products and are looking forward to a further fruitful cooperation.

If you have any queries, please do not hesitate to contact us. We are always at your service.

Best Regards,

FRAKO Kondensatoren- und Anlagenbau GmbH
