„Product of the Year Award“ for FRAKO Power Capacitors

We are pleased to announce that our Power Capacitors type DD60 Capacitor Line is the Bronze Winner for Consulting-Specifying Engineer “2017 Product of the Year Award” in the category “Electrical Distribution”.

Excerpt from the publication:

„... The Type DD60 ac power capacitor employs four degrees of safety plus patented design features that improve the reliability of capacitors in harsh environments. Contact to the internal windings is made by a patented, non-soldered contact ring to eliminate winding stress due to soldering. ... The segmented film completely removes a tiny section of film to prevent catastrophic failures due to severe transient voltages“.

Our DD60 line of power capacitors was customized for the requirements of the North American market. However, from a technical point of view they do not differ from all other FRAKO power capacitors.

FRAKO Power Capacitors are used for power quality applications, such as power factor correction and passive harmonic filters. The innovative design and patented technology of FRAKO power capacitors ensure a maximum degree of safety and reliability in ongoing operation.

For more information we would also like to refer you to AIM, our technical sales office for North America:
